

Diet and Nutrition Plans

Introduction

Nutrition accounts for approximately 70 percent of your fitness results. The following plans are created by certified sports nutritionists and tailored to specific goals. Always consult a dietitian before starting a new nutrition program.

Plan 1: Weight Loss Diet (1600 to 1800 calories per day)

This plan is designed for a caloric deficit of 400 to 500 calories per day. It is high in protein to preserve muscle mass during fat loss, targeting 0.5 to 1 kg of weight loss per week.

Pre-workout snack at 5:30 AM: 1 banana and green tea, approximately 100 calories. Breakfast at 7:30 AM: 50g oats with skimmed milk, mixed berries, and 4 egg whites, approximately 380 calories. Mid-morning snack at 10:30 AM: 1 apple and 10 almonds, approximately 150 calories. Lunch at 1:00 PM: 100g brown rice, 150ml dal, 100g grilled chicken, and salad, approximately 450 calories. Evening snack at 4:30 PM: 100g sprouts chaat and 200ml buttermilk, approximately 180 calories. Post-workout at 7:00 PM: 25g whey protein with water, approximately 110 calories. Dinner at 8:30 PM: 150g grilled fish or 100g paneer with stir-fried vegetables and 1 roti, approximately 430 calories.

Plan 2: Muscle Gain Diet (2800 to 3200 calories per day)

This plan provides a caloric surplus of 300 to 500 calories per day with high protein intake of 1.6 to 2.2 grams per kilogram of body weight. It supports muscle hypertrophy with strategic carbohydrate timing around workouts.

Early morning at 5:30 AM: 10 soaked almonds, 5 walnuts, and 500ml water, approximately 100 calories. Pre-workout at 6:00 AM: 2 bananas and 1 tablespoon peanut butter, approximately 220 calories. Breakfast at 8:30 AM: 3 whole eggs, 3 egg whites, 80g oats, 300ml milk, and fruits, approximately 620 calories. Mid-morning at 11:00 AM: 200g Greek yogurt with honey and 30g granola, approximately 280 calories. Lunch at 1:30 PM: 150g rice, 150g chicken breast, 150g rajma or chole, salad, and 1 teaspoon ghee, approximately 680 calories. Pre-workout shake at 4:30 PM: whey protein with banana and 300ml milk, approximately 380 calories. Post-workout at 7:30 PM: 40g whey protein with fast carbs such as banana or rice cakes, approximately 300 calories. Dinner at 9:00 PM: 150g paneer or chicken, 2 rotis, vegetables, and curd, approximately 580 calories.

Plan 3: Vegetarian and Vegan Performance Diet (2200 calories per day)

This complete plant-based diet meets all macro and micronutrient needs. It emphasizes complementary proteins and ensures adequate intake of vitamin B12, iron, omega-3 fatty acids, and calcium from whole foods.

Morning at 6:00 AM: warm lemon water with overnight-soaked chia seeds, approximately 50 calories. Breakfast at 8:00 AM: 3 moong dal cheela with mint chutney and 300ml soy milk, approximately 420 calories. Mid-morning at 10:30 AM: 30g mixed nuts and seeds with seasonal fruit, approximately 200 calories. Lunch at 1:00 PM: 100g brown rice, 150g rajma, sauteed vegetables, salad, and flaxseed chutney, approximately 550 calories. Snack at 4:00 PM: 50g hummus, whole wheat crackers, and cucumber sticks, approximately 220 calories. Post-workout at 7:00 PM: 30g pea protein shake with almond milk and banana, approximately 280 calories. Dinner at 8:30 PM: 150g tofu stir-fry, 100g quinoa, steamed broccoli, and curd, approximately 480 calories.

General Nutritional Guidelines

Drink 3 to 4 liters of water daily and add 500ml for every hour of intense exercise. Avoid sugary beverages and excessive caffeine. Consume 20 to 40 grams of protein within 30 to 60 minutes after a workout for optimal muscle protein synthesis. Avoid processed foods, trans fats, refined sugars, alcohol, and crash diets that restrict calories below 1,200 per day. Commonly beneficial supplements include whey protein, creatine monohydrate, multivitamins, omega-3 fatty acids, and vitamin D3.
